Lancaster Farming

VOL. 12 NO. 9 | Lancaster Farming, Saturday, January 28, 1967 | $2 Per Year

JOHN HENKEL, president of the Lancaster County Swine Producers Association, reviews the facts on Penn State's new meat evaluation center with research veterinarian Dr. Howard W. Dunn, left, and extension livestockman Dwight Younkin, right. The two Penn State specialists addressed county swinemen Monday night at the Lancaster Farm Credit Building. L. F. Photo

Poultrymen Advised On Preserving Farm Rights

What can you do to preserve your right to farm? Lancaster County poultrymen got some answers to that ever-pressing question Tuesday night at the Lititz Community Center

A planning director said, "Agricultural zoning can protect farmers from unwise use of land by those not directly dependent on the land for their livelihood"

A poultryman who has been through the "suburban crushing mill" advised that "Fly and odor problems on poultry farms are increasing, and, unfortunately, the people who always complain about such things are also increasing"

A regional health department official cautioned that "The revised clean streams law and the new sewage facility act will bring about some drastic changes in the way we make our living"

Finally, a public affairs specialist urged poultrymen to "Get involved and become part of the total community to help avoid future conflicts between people and poultry"

PRESERVE AGRICULTURAL ZONES

"In Lancaster County, zoning can be an important tool in preserving agricultural land

Crops & Soils Day Feb. 10th

The annual Lancaster County Crops and Soils Day is slated for Friday, February 10, associate county agent Arnold Lueck announced this week.

The countywide event will be held in the Guernsey Sales Pavilion again this year, Lueck said, and will feature agronomic information for farmers and for agribusinessmen who work with farmers

Topics which will highlight this major event include crop varieties, fertilizer usage, weed control practices, corn production, handling and feeding of crops, and other timely information for the new growing season ahead

(Continued on Page 4)

Specialists Review Housing And Diseases At County Swine Meeting

Two Penn State University specialists teamed up Monday night to give some 40 members of the Lancaster County Swine Producers Association the latest story on disease treatment and research, and tell them how to influence the housing environment to avoid some common disease and management problems

A leading swine research veterinarian, Dr Howard W Dunn, discussed several swine diseases which are becoming increasingly important, and used colored slides to illustrate the latest findings He also dwelt at some length on hog cholera, advising hogmen to avoid vaccinating pregnant sows at anytime with an attenuated live virus.

In response to the question, "When is the best time, and what should be used, to revaccinate a sow between farrowing and rebreeding?", Dunn advised using crystal violet as a booster shot, adding, "Don't use a live virus on a sow once she's in the breeding herd"

Many states that have obtained good control over hog cholera will no longer permit attenuated vaccines to be used, the veterinarian said. He suggested that Pennsylvania was very close to being in such a favorable position itself, adding that hogs coming into the

TOBACCO SEASON BEGINS AS SIX BUYERS BID

The unseasonal weather seemed to inspire everyone in Lancaster County this week; even the tobacco buyers.

Buying activity was reported Wednesday as American Tobacco Co. and P. Lorillard Co. both had buyers in the field. Prices reportedly offered ranged from 31 to 26 cents for wrapper, and 18 to 15 cents for filler leaf.

The number of buyers had swelled to six by Thursday, as Lancaster Leaf Tobacco Co. and three independent buyers were reported active.

Reports of sales made appeared to be primarily in the central and southern parts of the county with prices offered mostly falling into the upper range for both wrapper and filler.

Some straight stripped prices of 25 cents a pound were also reportedly offered.

Cattle Feeders To Hear County Agent Smith

Cattle feeders in northeastern Lancaster County will hear county agent M M Smith discuss some of the factors involved in managing feeder cattle profitably Wednesday night, February 1.

The meeting, which will be held at the Lincoln Independent School, near Martindale, will be open to all interested farmers in the area, accord-

FULTON GRANGE SLATES FEBRUARY ACTIVITIES

Fulton Grange #66 held its bi-monthly meeting January 23 at the Grange Hall in Oakryn. Master, Clifford W. Holloway Jr presided The Charter was draped in memory of Mrs Maude A Christie.

The membership committee reported that the "Peapickers" team is still in the lead in the contest

The home economics committee will have a refreshment stand at the Maurice Gregg sale April 1 and will be in charge of the Grange's annual roast turkey supper April 8 at the Grange Hall.

The committee for the Hobo show which will be given this spring is: Richard Nye, Miss Mabel Brabson and Charles McSparran.

The youth committee will sponsor a "Hat-A-Rama" at the Grange Hall Tuesday, Febru-

SWCD Directors List '67 Goals

At a special meeting Monday night, directors of the Lancaster County Soil & Water Conservation District mapped twelve goals for 1967

Given top priority was a proposal put forth by chairman Amos H Funk for greater promotion of cropland terraces as a conservation tool Directors agreed that conservation in the county could be furthered if farmers were more aware of the soil saving benefits of terraces, particularly where continuous row crops are raised on slopes

The 1967 State SWCD Association convention which will be hosted by Lancaster County next November also rated high on the list of top priority goals

Other major goals which will guide the District's efforts this year are:

1—More community watershed meetings to encourage the

Future Farmers Install Officers; 23 Members Get Red Rose Degrees

At the Lancaster County Chapter Future Farmers of America meeting Monday night at Elizabethtown High School, officers for the new year were formerly installed. Red Rose Degrees, the highest official FFA honor a boy can earn at the county level, were conferred upon 23 members

Retiring president Robert Weaver of Lampeter-Strasburg High School formerly turned the gavel over to his successor Howett Seiverling, Warwick High School.

Other county officers for 1967 are vice president, Bill Buchter, secretary, Galen Yoder, treasurer, Jerry Phillip; sentinel, John Kurtz; corresponding secretary, Clair Erb; chaplain, John Nissley; parliamentarian, Barry Nickel; and reporter, Tom Houser.

Boys receiving Red Rose Degrees, and their schools are

EXCLUSIVE FIBERGLASS TANK

newest feature of GEHL Mix-All

Another Gehl first! New, optional Mix-All tank of modern fiberglass reinforced plastic — the space-age building material. Advantages: tank is strong as steel, yet weighs ¼ as much; rust-proof (not affected by salt or minerals); permanent molded-in white color won't scratch, peel or require re-painting, smooth interior sides reduce feed bridging, allow faster unloading; insulates better, reduces moisture condensation.

OTHER GEHL MIX-ALL FEATURES:

- **66 thin, steel hammers** that CUT . . . not POUND to give you a uniform grind.
- **Semi-suction fan** draws materials through screen quickly.
- **Feed aerator** cools all milled ingredients. Prevents caking.
- **Swinging auger feeder** uniformly loads the mill at your choice of speeds

Come in! See the Gehl Mix-All with new fiberglass tank.

From Where We Stand . . .

Farming On Asphalt

One of the greatest fears of conservationists is that open land, once irresponsibly "urbanized" into the asphalt jungle, will be lost to productive usage practically for all-time.

Now there comes a glimmer of hope that when Main Street has become obsolete, parking lots and out-dated highways abandoned, the areas may be salvable for farming.

Not really, but it illustrates the interesting extent to which agricultural research can sometimes go.

A research report out of Delaware this week tells about an experiment which produced crops on asphalt. This weird type of cultivation was inspired by the combination of continuing drought and the sandy Delaware soil with its poor moisture and nitrogen-holding capacity.

Researchers buried a layer of asphalt under 18 inches of soil to try to retain vital moisture in the ground, and then planted it Did it work? An agricultural engineer, who will report on the project during Delaware University's Farm & Home Week (Feb. 7-9), says it did.

Now, all the scientists have to do is figure out how to reclaim the nutrients from our increasingly polluted atmosphere to fertilize the crops grown on asphalt, and we'll be all set to meet the crush of expanding humanity head-on, and still grow food!

★ ★ ★ ★

June In January

The fella who wrote that old-time Bing Crosby hit song was sure talking about this week in Lancaster County! Records have dropped, while windows and hopes have been raised, and it is June in January — almost

This brief respite from winter's wrath has been most welcome But, of course, we all realize it can't last — can it? Right now Old Man Winter is probably laughing up his sleeve at us as he winds up over the midwest to deliver his next slippery pitch — a slider, no doubt That one may be whistling across home plate even as you read this.

But take heart, a look at the calendar tells us that the proverbial groundhog will be making his appearance next week According to tradition, the worst he can tell us is to expect six more weeks of winter We forget what his good prediction is because it seems like we always get six more wintry weeks anyway.

As one cryptic clown remarked this week, "It's a good thing we didn't get this heat wave in the summertime or we'd have really been in trouble". We'll leave you to puzzle over that one as you hunt up your trusty old snow shovel.

★ ★ ★ ★

Pruning The "Bigot-Tree" In Lancaster County

Did you know that Lancaster County — generally referred to as The Garden Spot of America — is, in fact, a "cesspool of bigotry"? (bigotry, according to the dictionary, is the condition of being attached to a creed, belief, or opinion to the point of being intolerant of all evidence to the contrary)

We didn't realize this repugnant fact either until it was pointed out in the daily press this week by an official of the National Association for the Advancement of Colored People (NAACP)

He, Philip Savage, reportedly claimed "there are more bigots, racists and unsavory characters in Lancaster than I have ever seen before". His solution to this supposed problem is to mount a full-scale invasion by pickets, demonstrators, and marchers to convince Lancastrians of the error of their ways.

Late Winter-early Spring is generally pruning time in the orchards and vineyards. Savage seems to feel it is also a good time to shake the bigots from the Lancaster County tree with shouts of "foul" and the sound and sight of marching feet, with dramatic "sit-ins" and flagrant flouting of the laws by which we all live — black and white.

His proposed, dramatic protests will undoubtedly make big headlines near and far, especially since they will occur in historically peaceful Lancaster County, but all the noise, activity and aroused feelings will also undoubtedly knock many promising buds from the "tree" — buds that through proper maturing could have ripened into fruit to nourish ALL mankind.

Many of the reactions to Savage's belligerent statements this week suggest a fear that, if his threat of emotional violence is carried out, it will disrupt much of the quiet, non-emotional, constructive effort (dedicated to the same cause he supports) that has been going on behind the scenes in Lancaster County

We begrudge freedom to no man, but demand he accept the responsibility that accompanies it Equality is the birthright of every American, but he who demands the right to be "more equal" than anyone else places the whole concept of equality in jeopardy.

Crosses: One-Half Off

Lesson For January 29, 1967

Background Scripture Luke 9 and 10
Devotional Reading John 15 1 11

I heard this little ditty on the radio the other day:

I don't care if it rains or freezes,
Long as I have my plastic Jesus
Riding on the dash board of my car!

Rev. Althouse

Some people, it seems, look to Jesus for insurance against any unforseen hazards (including crosses!). What they want is security. What he offers, however, is a cross!

Of course, we all love the cross. We love those little crosses we wear on the lapels of our coats or on dainty chains around our necks. We admire the golden and silver crosses on our altars or the remote crosses of church steeples. We love to sing about "the old rugged cross on a hill far away," but the life-sized crosses close at hand is a cross of another color.

Unconscious Irony

Last spring one day I saw a sign in a downtown store window: "POST-EASTER SALE: CROSSES AND BUNNIES ONE-HALF OFF!" It struck me that the sign carried a certain amount of unconscious irony. The pain and the agony of the cross are quickly forgotten. What most people want is a marked-down Christian discipleship.

Many of us, perhaps, are like the two ladies who went to Stratfordon-Avon to see Shakespeare's home and attend one of his plays. How wonderful it would be to write home to say they had actually seen a Shakespeare play in his own town. The play they went to see, however, was **Titus Andronicus**, a thoroughly gory play. When they emerged from the theatre, the two women were obviously shaken by their experience. For a while they said nothing until one of them spoke up with a force smile: "Let's simply have some tea and forget it!" People often have the same reaction to the cross.

We can imagine that the disciples reacted in much the same way. Jesus had suddenly taken them from Galilee to Caesarea Philippi. They knew something was in the air. Then, he began to question them. Who did the people say that he was? They told him. Then, ". . . who do you say that I am?" Without a moment's hesitation, Peter sprang forth with a confession which, until now, had never been spoken in Jesus' presence: "The Christ of God." It was out in the open at last! What a wonderful moment for the little band.

Strange Response

Yet what a strange response Jesus made to that wonderful confession. "The Son of man must suffer many things, and be rejected by the elders and chief priests and scribes, and be killed . . ." (Luke 9:22 RSV) One moment they were rejoicing in the knowledge that they were to share the honor of being the disciples of the Chosen One of God Now, however, he seemed just as quickly to snatch that joy away with his dire predictions o suffering, rejection, and death. It was obvious there would be no bargain-basement discipleship for those who followed him.

A member of a former parish once told me irritably "Preacher, I come to church to relax, to find peace and quiet; all you do is stir me up and make me uncomfortable." I could sympathize with him. It gets to the point that one gets very, very tired of all the challenges thrown out to the Christian, all the human needs marked "urgent." It is understandably human that we seek peace of mind, not crosses

What we must realize, however, is that we can find our peace of mind as he found his: not by making peace with the forces of evil, but by remaining faithful to our calling. Our peace is found, not so much in being withdrawn from the bombardment of life's trials and challenges, but in remaining faithful even unto the cross.

True peace cannot be marked-down below the price of the cross.

Now Is The Time . . .

By Max Smith, Lancaster County Agent

To Provide Minerals

Livestock producers will continue to face the problem of keeping down production costs In order to do this one step is to provide all of the requirements needed for fast gains and maximum production Salt and minerals are necessary at all times for nearly all kinds of livestock Most commercial feeds will contain some salt and minerals, but in most cases not sufficient to meet the needs of the animals Free choice, loose salt is the recommended manner to offer salt to livestock For most animals a mixture of equal parts of trace mineralized salt and di-calcium phosphate will meet the major mineral needs Don't reduce maximum performance by restricting salt and mineral intake

SMITH

To Vaccinate Swine Herd

One of the speakers at the recent swine management meeting stressed the importance of all hog producers to attempt to immunize their animals against the dreaded hog cholera infection This practice is important to the commercial feeder with several hundred head as well as the owner of a swine breeding herd There are various vaccines that can be used, but the important thing is to get the animals vaccinated against the disease at an early age (6 to 10 weeks of age)

To Prune Shade Trees

By the time this column gets to the reader it may be severe winter again, however, the recent spell of spring weather reminds that February and March are the best times to prune most shade trees and many shrubs While the plant is dormant there will be less injury and loss of sap; without leaves the skeleton of the tree is more easily shaped and planned.

● Crops & Soils

(Continued from Page 1)

Among the speakers on the day-long program will be chairman of agronomy extension James H Eakin, Jr Eakin is well-known for his work in lime and fertilizer manufacture, and their use in crop production, Lueck said

Many of you may have seen "The Good Egg" as created by the Pennsylvania Egg Marketing Association, which made its debut at the recent Pennsylvania Farm Show in Harrisburg.

Every Month Is Egg Month

- Did you do all you could to help promote your industry in the past year?
- Do you talk EGGS to consumers?
- Do you explain their many nutritional advantages?
- Do you set the example when you take your family out for a meal and order eggs in some form?
- Do you have the feeding program which gives the best return per dollar spent?

If you are in doubt about this last item, talk to our Nutrition Department or one of our Poultry Specialists.

● Swine Meeting

(Continued from Page 1)

Philadelphia markets are now our main source of cholera infestations The use of serum alone as a means of controlling the spread of hog cholera in sales barns may come into use as the need for an attenuated vaccine lessens, Dunn said.

CONDENSATION AND VENTILATION

Livestock specialist Dwight Younkin discussed the problem of condensation and how to solve it with insulation and ventilation

He explained the relationship between air temperature and humidity, and the effects of each on the rate of condensation For example, he said, when relative humidity is at 70 percent, and the inside air temperature is at 60 degrees, condensation will occur when the moist air hits cold walls and is cooled to 50 degrees

Younkin pointed out that while condensation isn't too much of a problem in a slatted floor building, without slats pens and floors will get messy in short order

He reviewed different types and values of insulating materials that could be used to keep walls warm and prevent condensation Younkin recommended a minimum insulation value of 6 0 for walls, which he said could be obtained by using two-inch thick insulating bats or blankets

"To reduce heat loss however," Younkin said, "you'll have to have at least four inches of insulation in the ceiling"

Ventilation, the specialist said, is a must to properly remove moisture from hog buildings He described several systems that could be used involving slot and fat combinations in either new houses or remodeled barns

A critical time for ventilation is when sows are farrowing in the hot weather He explained a system of "zone air conditioning" being used by many large operators. It is handled by piping cool air directly to the sow, and making it available continuously during farrowing. "Fans will circulate air in summer, but they don't help much in cooling the animals," Younkin said.

MEAT EVALUATION CENTER

Younkin told the swine producers that the new meat evaluation center at Penn State will soon be available to them for swine testing programs. Such factors will be measured as feed efficiency, rate of gain, feet and leg characteristics, and, after dressing animals out, ham-loin percentage, backfat, and loin-eye will be determined, he said

February 1 is the nominating date for hog entries, and April 15 will be the date pigs come into the center The testing facilities contain 10 cattle, 20 hog, and 5 sheep pens, Younkin said, with each pen holding six animals The purpose of the program is to evaluate sire groups, he said, explaining that all six pigs a breeder enters as one pen must have a common sire, but they may come from as many as six different dams

He urged the swine producers with breeding programs to take advantage of this new service, and invited anyone who wished to visit the facilities to do so

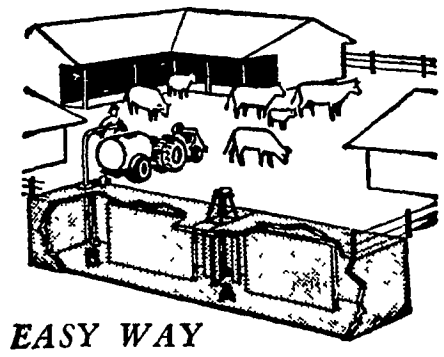
A meeting of officers and directors of the county swine association met briefly following adjournment of the educational program

PROTECT BABY PIGS

Cold, drafty, wet farrowing pens cause troubles with baby pigs This is why about one-third of all pigs born never reach market The high death rate among baby pigs can often be prevented by good management, reminds Lester A. Burdette, extension livestock specialist at Penn State University

DAIRYMEN-CATTLEMEN

Here's the answer to your MANURE PROBLEMS



EASY WAY MANURE DISPOSAL SYSTEM

Saves Time—Saves Fertility

Just scrape or wash manure, bedding waste and feed into Easy Way holding tank When you're ready, the powerful agitator and self-priming chopper impeller pump will put the homogenized mixture into Easy Way liquid field spreader. No clog — no mess — no stink.

For complete information on the EASY WAY DISPOSAL SYSTEM write to:

Reflections

(From the files of Lancaster Farming)

One Year Ago

January, 1966

Kauffman Bull Wins at Farm Show — Penn Springs Leader, a senior yearling Holstein bull exhibited by Robert H Kauffman of Elizabethtown R1, was Lancaster County's top title winner at this year's Farm Show

Runnerup to Leader in the senior yearling bull class was an entry owned jointly by John Esh, Goldonville, and Raymond A Seidel of Berks County

Although countians garnered an assortment of 13 ribbons in the Holstein competition, Kauffman's win was the only first place gained

* * * *

Kline Reelected By Manheim YFA — Paul Kline, Lititz R3, was reelected president of the Manheim Young Farmer Association Monday night (January 10). Kline is also president of the State Young Farmers

Other officers elected were Donald Hershey, vice president; Jay Rohrer, secretary, Gerald Snavely, treasurer, and Jay Foreman, public relations director

Farm Show Celebrates Golden Anniversary — Observing its 50th year of continuous operation, the state's leading farm show this year saluted progress in Pennsylvania agriculture.

It was appropriate that this should be a record-breaking year for the big show. Some 700,000 Pennsylvanians took advantage of the generally "non-typical" Farm Show Weather to beat the previous record of 690,000, set in 1963.

* * * *

County Tobacco Title to Fisher — Melvin S Fisher, Strasburg R1, topped a 168-entry field Thursday (January 6) in the Lancaster County tobacco show with championships in both wrapper and filler classes

Reserve champions in wrapper and filler classes, respectively, were Melvin L Long, Lititz R3, and Roy M Rohrer, Strasburg R1

The champion binder entry belonged to Robert B Leed, 2421 Fruitville Pike. Reserve binder was exhibited by Witmer J Rohrer, Strasburg R1

In the vocational competition, Richard Thomas, Millersville R1, won his second championship in a wek, having topped the 4-H tobacco show earlier

Champion Gobbler Brings $4 A Pound — The Farm Show grand champion dressed turkey, a 17¼-pound tom raised by Paul Konhaus of Mechanicsburg, sold to D E Horn & Co for $42 a pound

J C Snavely & Sons, Inc Landisville, bought Harry Lamparter's reserve champion at $17 50 a pound

The two birds were auctioned Wednesday night (January 12) as a feature of the Pennsylvania Poultry Federation banquet at the Penn-Harris Hotel, Harrisburg.

Cigar Filler Supply At 4-Year Low — The 1965-66 carryover stocks of Pennsylvania cigar filler tobacco are about three percent below 1964-65, and have hit a four-year low level, according to USDA's "Tobacco Situation" report.

The sizeable drop in carryover more than offset the moderate increase in the 1965 crop from a year earlier, USDA said.

The number of acres planted to Type 41 tobacco in 1965 was unchanged from the preceding year at 27,000 acres

Five Years Ago

January, 1962

Top Corn Yield To Fred Frey — The top spot in the Lancaster County five-acre corn contest this year went to Fred Frey, Quarryville R2, it was announced this week (January 6) by Penn State University Frey averaged 170 2 bushels of shelled corn per acre

Frey said he had planted corn on that same piece of ground for the past five years, and felt his yield had been better each year He used a Pfister single cross, FSX19

Second high yield in the county was made by Harold Rohrer, Lancaster R7 Using Funk G91, he obtained a yield of 161 8 bushels per acre

LF Buys Lititz Paper — Lancaster Farming publisher R. G Campbell announced this week (January 6) the purchase of the Lititz Record-Express and the Record Printing Company, a commercial printing unit operated jointly with the Lititz weekly paper. Both newspapers will be published from the Lititz plant, Campbell said.

* * * *

Producers' Co-Op To Stay Independent — Producers' Cooperative Exchange, Coatesville, will remain an independent egg marketing agency by stockholder demand.

Members voted 150 to 54 to reject the proposal by which the Pennsylvania Farm Bureau Cooperative Association would assume all assets and liabilities of the egg marketing co-op in an exchange of stock transaction.

The decision was reached to reject the proposal at a special stockholders' meeting Tuesday night (January 24) at Pequea Valley High School

Trimble Named State Holstein Boy — Donald B. Trimble, Quarryville R1, was named Pennsylvania Holstein Boy of 1961 Wednesday (January 10) at the State Farm Show.

The 19-year-old dairyman operates a 60-acre farm and has compiled an outstanding 4-H and FFA record, including the current presidency of the 4-H County Council, and a State FFA post last year.

Larson Succeeds Albrecht As Extension Director — Dr. Russell E. Larson, department of horticulture head at Penn State University, was named director of extension and associate dean of the College of Agriculture at the university,

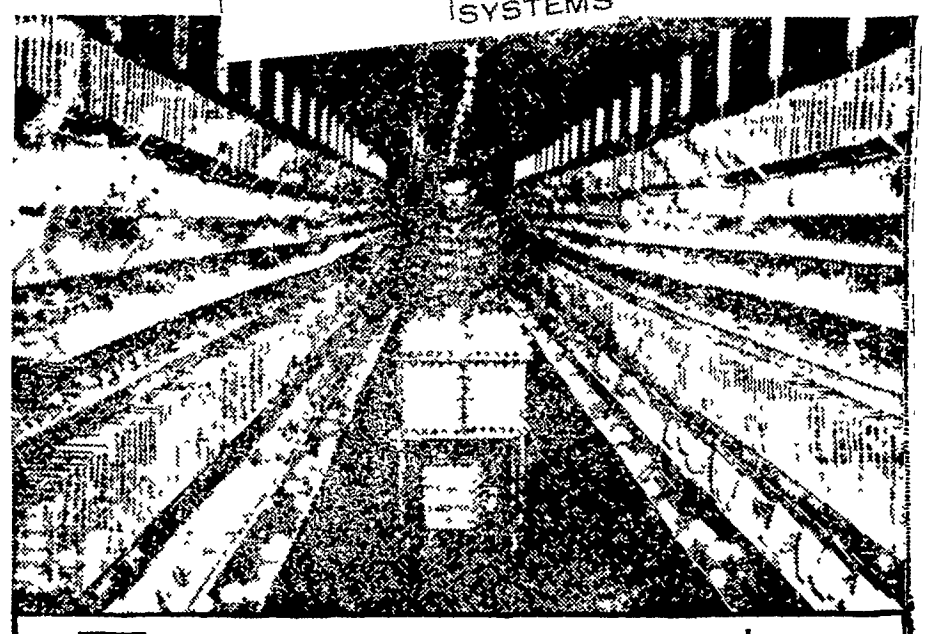
Big Dutchman®
CAGES



BIG DUTCHMAN COMPLETELY AUTOMATED FLAT DECK CAGE SYSTEMS . . . include automatic feeding; watering; central, one table, egg collecting from any number of birds; along with automatic manure removal equipment. The central, one table, automatic egg collecting system brings all eggs gently to one spot, enabling one person to easily collect from 25,000 birds. Egg collector is designed for easy connection to automatic washers, candler-graders and packers, for completely automated system.

Profit designed cages by Big Dutchman permit more effective ventilation and complete unobstructed lighting. Big Dutchman's automatic feeding system assures even distribution of feed to all birds. New degrees of flexibility and convenience are now possible along with exclusive features that permit greater feed savings and complete environmental control of more birds with less labor.

Big Dutchman, a pioneer in poultry house automation and in cage systems that have been widely imitated, but never duplicated . . . offer quality features and proven dependability in a cage system to fit your specific needs and operation.

AUTOMATIC OR HAND FEED TIERED CAGES . . . "It Costs No More To Own The Best." Find out today how you can begin obtaining increased profits from your poultry operation with the industry's best selection of a low investment, high production, Big Dutchman cage system to fit your plans or existing poultry house, large or small. Contact your local branch or write today for the very latest in Flat Deck or Tiered Cage information.

● Poultry Assn.

(Continued from Page 1)

in large parcels, and prevent spiraling land values It can protect the rural way of life by maintaining agricultural zones." Lancaster County Planning Director Ellis Harned told the poultrymen, adding, "It enables a farmer to proceed with his farming operation without fear of being interfered with."

Harned explained that the planning commission had no authority for planning or zoning in the county since there is no countywide zoning ordinance at present Subdivisions do come under the commission's authority, but the primary function of the commission is to advise local planning boards

"Zoning is a municipal function," Harned said, "regulated by the boroughs and townships of Lancaster County."

How do you get a zoning ordinance and when should a municipality zone? An ordinance should be tailored to the needs of a particular community. Harned cautioned against copying some other community's program. When to zone? "Before the urban 'sprawl' occurs," he said, adding that zoning is not retroactive; it can not be used to remove developments which already exist.

The director pointed out that the purpose of any zoning ordinance is merely to implement a comprehensive plan The plan always comes first, and should be an outline of community goals A community first decides where it wants to do, then develops a plan for getting there, and then establishes zoning ordinances which are vital to carrying out the plan

Rural people should be interested in agricultural zoning, understand it, and work with their local planning authorities, Harned said.

SUBURBIA AND THE POULTRYMAN

"Smell — that's the number one offender on the poultry farm as far as the suburbanite is concerned," according to C.

(Continued on Page 12)

SPEAKING AT THE COUNTY POULTRY ASSOCIATION meeting Tuesday night were: from left (seated), Ellis Harned, Lancaster County Planning Director; Wm. Carroll, Penn State public affairs specialist; C. M. Buchman, Bucks County poultryman; and standing, center, J. P. Durr, regional sanitary engineer with the State Health Dept. At Durr's left is John H. Hess, president of the Lancaster County Poultry Assn., and standing, right, Dr. Floyd Hicks, extension poultry specialist. Hicks was master of ceremonies. L. F. Photo

zip-pak from anderson the world's largest selling egg case... now available in all standard sizes

(special sizes, too!)

Faster than you can say "Zip-Pak" the Anderson Zip-Pak egg case snaps open, ready for use . . . folds flat just as quickly. And, no staples or tape are necessary! Production records will prove how fast savings on egg handling add up when you change to the patented Anderson Zip-Pak. Add to this the supreme quality of the corrugated board and you have egg cases that provide protection to the eggs. Each egg you ship arrives safely. Store managers like Zip-Pak handling. Store customers like fresh whole eggs. Satisfy them both and make money too!

For the Farm Wife and Family

By Mrs. Richard C. Spence, Food Editor

SPENCE

CHICKEN FARE

Cooking tasty foods for a dieter can be a real challenge. Follow your doctor's advice carefully and substitute permitted foods and artful seasonings to create outstanding dishes. If you can put together the right combinations of foods, using each in the right proportion, you have mastered the secret of a gourmet meal.

For those who must cut down on carbohydrate, Chicken Julienne is combined with orange sections and celery in a coconut sauce. Bonus dumplings are made with saltine crackers.

CHICKEN JULIENNE

- 2¼ cups skim milk
- 1 (3½ or 4-oz.) container flaked coconut
- ¼ cup all-purpose flour
- ¼ teaspoon ground white pepper
- 1¼ teaspoons salt
- 3 chicken breasts, boned and skinned (approximately 1½ pounds)
- ⅓ cup vegetable oil
- 1 clove garlic, minced
- ¼ cup chopped onion
- 1 cup sliced celery
- 2 oranges, sectioned and drained
- 1½ tablespoons cornstarch
- 2 (3-oz.) packages low fat cream cheese, softened
- ¼ cup chopped parsley
- 18 saltines, finely rolled

In medium saucepan, slowly heat 2 cups milk with coconut until bubbles form around the edge. Set aside. Combine flour, pepper and ½ teaspoon salt in plastic bag. Slice the chicken into long slivers about ¼ inch wide. Shake in flour mixture until evenly coated. Heat ¼ cup oil in large skillet; saute chicken slivers over high heat until lightly browned, turning often. Turn into greased 1½ quart casserole. To skillet, add remaining oil, garlic, onion and celery. Saute 4 to 5 minutes. Add to chicken and toss to blend. Arrange orange sections on top.

Strain coconut-milk and blend with cornstarch in a small saucepan. Cook and stir until mixture thickens and comes to a boil. Add remaining ¾ teaspoon salt. Pour over oranges. In small bowl of electric mixer, beat cream cheese until light and fluffy; gradually add remaining ¼ cup milk. Stir in parsley and cracker crumbs. Drop by spoonfuls on top of casserole. Bake in a preheated moderate oven (350 degrees) 25 to 30 minutes. Makes 8 servings.

* * *

In this recipe chicken is combined with broccoli to turn out a delicious casserole.

CHICKEN WITH BROCCOLI

- 6 chicken thighs
- 1 cup water
- 1 teaspoon salt
- 2 packages (10 oz. each) frozen broccoli spears OR 2 pounds fresh broccoli
- ¾ cup water
- ½ teaspoon salt
- ¼ to ½ pound process cheddar cheese, finely diced
- ¼ cup whole or skim milk
- 1 tablespoon lemon juice
- 1 teaspoon Worcestershire sauce
- ½ cup shredded wheat, ready-to-eat cereal, crushed
- ⅛ teaspoon oregano

Simmer chicken in salted water until tender, about ¾ to 1 hour. Preheat oven to 350 degrees (moderate). Cook broccoli in salted water until almost tender, about 6 minutes. Drain.

Place broccoli in a 1½ quart casserole. Arrange chicken pieces on top of broccoli. Melt cheese in milk in a pan over boiling water. Add lemon juice and Worcestershire; stir until smooth. Pour over chicken and broccoli. Top with crushed shredded wheat mixed with oregano. Bake 15 minutes or until browned. Makes 6 servings, ¾ cup each.

Calories per serving: About 315 if made with ½ pound cheese; 240 if made with ¼ pound cheese.

Menu suggestion: serve with mashed potatoes and tomato aspic. Have ice cream topped with fruit for dessert.

* * *

Chicken Stroganoff is not necessarily for the calorie counter but for anyone who likes delectable food.

CHICKEN STROGANOFF

- 2 broiler-fryer chickens (2½ to 3 pounds) cut up
- 1 cup regular all-purpose flour
- 1 tablespoon salt
- 1 tablespoon paprika
- 2 teaspoons poultry seasoning
- ½ teaspoon pepper
- Butter
- 1 pound fresh mushrooms, halved or sliced
- ½ cup chicken broth OR 1 chicken bouillon cube dissolved in ½ cup boiling water
- 2 cups dairy sour cream at room temperature
- Chopped parsley

Combine flour and seasonings. Coat chicken pieces with flour. Save remaining flour. In skillet melt ¼ cup (½ stick) butter. Brown chicken, adding butter as needed. Remove from skillet. Saute mushrooms 8-10 minutes; remove, drain and set aside. Pour drippings into 13x9x2 inch baking pan; add chicken, skin side up. Bake 30-35 minutes in a 350 degree oven. Transfer to warm platter. Pour drippings into bowl; let fat rise. Measure 3 tablespoons fat into pan. Blend in 3 tablespoons seasoned flour. Stir in broth. Cook, stirring constantly, over low heat until thickened. Cook 2 minutes more. Add mushrooms; cook, stirring constantly, about 1 minute. Stir in sour cream. (Do not boil.) Pour over chicken. Sprinkle with parsley. Makes 8 servings.

* * *

A hearty salad combining fruit with a generous amount of cooked chicken makes a satisfying meal. A hot soup or hot bread completes the menu.

CHICKEN-FRUIT SALAD

- 3 cups chicken, cooked and diced
- 1 cup grapes, seedless, halved
- 2 cups pineapple chunks, drained
- 1 cup apple wedges, unpeeled
- ½ cup salad dressing
- 6 lettuce cups
- Paprika, as needed
- ½ cup almonds, slivered (optional)

Combine chicken, grapes, pineapple chunks, and apple wedges. Chill before serving. Blend lightly with salad dressing. Dip edges of lettuce cups in paprika. Serve salad on lettuce cups. Top with almonds, if desired. Serve with the following dressing:

FRUIT-WHIPPED CREAM DRESSING

- 3 tablespoons butter or margarine
- 3 tablespoons flour
- ⅓ cup sugar
- ⅛ teaspoon salt
- ¼ cup lemon juice
- 1 tablespoon orange juice frozen concentrate
- ⅓ cup pineapple juice, canned or frozen
- 2 egg yolks, slightly beaten
- ½ cup whipping cream

Melt fat in top of double boiler. Stir in flour, sugar,

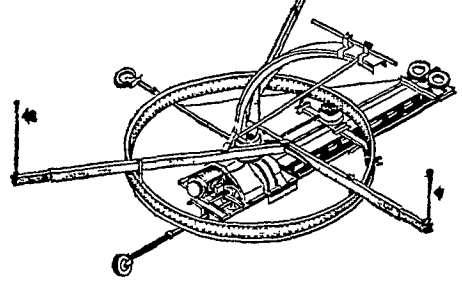
YOU'VE GOT TO HAVE A SYSTEM— GO JAMESWAY POWER CHORING

BIG J 3 POINT SUSPENSION



NO WEIGHTS TO ADJUST CUTS LEVEL

Eliminate time-taking adjustments of balance weights and drive drums with a Jamesway Volumatic silo distributor-unloader. True three-point suspension holds machine level from top of silo to bottom. Power circle drive eliminates surface-drive drums, gives you positive power for unloading frozen silage or fluffy haylage every time.

● Reflections

FIVE YEARS AGO

(Continued from Page 6)

it was announced this week (January 13).

Larson succeeds Dr. H. R. Albrecht in the extension post. Albrecht resigned December 31 to accept the presidency of North Dakota State University.

* * * *

Ten Years Ago

January, 1957

Eleven Keystone Degree Winners — Eleven vocational agriculture students from Lancaster County schools will be awarded Keystone Farmer degrees at next week's Farm Show.

Heading the list as County Star Farmer is J Richard Herr, Ronks R1, of Lampeter-Strasburg High School

Others being honored are: Melvin Martin, Manheim Central; Gerald Rohrer and John Eshelman, both of Penn Manor; Kenneth Garber and Lloyd Denlinger, both of Lampeter-Strasburg; Robert Bricker, Clair Carter, Marion Findley, Glenn A. Aument, and Calvin D. Keene, all from Solanco.

* * * *

Kitch Appointed Forester — John H. Kitch, Denver, has been appointed resident forester for Lancaster County, the Pennsylvania Department of Forests & Waters announced this week (January 4).

Kitch, a native Lancaster Countian, took his forestry studies at the State Forest School at Mont Alto, and at Penn State University.

* * * *

State Young Farmers Elect Staman — Thomas Staman, Columbia R2, was elected president of the Pennsylvania Young Farmer Association at Harrisburg last week (January 18).

Forney Longenecker, Lititz R3, was named secretary.

Other countians elected to offices in state organizations during Farm Show meetings at Harrisburg were: Raymond Witmer, Willow Street, a director in the Guernsey Breeders' Association, and Elmer Lapp, Kinzers, vice president of the Pennsylvania Horse & Mule Association

Baby Beeves Average $32.15 A Pound — Sixty-two tons of 4-H baby beef went under the hammer at the Farm Show Baby Beef Sale Friday (January 18). The calves averaged $32.15 a hundredweight.

The grand champion shown by Glenn Foreman of Manheim R3 topped the sale. The 1075-pound Angus sold for $1.67 a pound to Howard Johnsons Restaurants.

The same firm bought the reserve grand champion — also an Angus — which was exhibited by Herbert Frey of Lancaster R1

* * * *

Solanco Ag. Teacher Gets Award — An honorary Keystone degree will be awarded at the Farm Show next week (January 16) to Jackson H Owen, Solanco High School vocational agriculture teacher

Owen, a Penn State University graduate, has taught at Solanco for the past four years, and has had 19 students awarded Keystone degrees under his guidance

Worth Knowing About Macaroni Products

Durum macaroni products are available in more than 150 shapes Just imagine the extra interest you could create in your favorite macaroni recipes simply by varying the shapes of the product you use

Popular macaroni shapes include noodle bows, alphabets, shell macaroni, small and jumbo macaroni shells, medium and broad noodles, long and elbow spaghetti

You can use macaroni, spaghetti, and noodles interchangeably, making all substitutions weight for weight For example, you can prepare a casserole dish with either an eight-ounce package of shell macaroni or an eight-ounce package of noodle bows.

When you choose enriched durum macaroni products, you get thiamine, niacin, and riboflavin — three of the B vitamins — and the mineral iron.

Macaroni products contribute important amounts of cereal protein And when you pair this with a small amount of animal protein, the cereal protein becomes complete and adequate for growth, repair, and upkeep of the body

For Better Sewing Results

For top performance from your sewing machine, keep it clean This means taking out lint and dust regularly

Keep the machine covered when not in use and you'll cut down on the dust that gets into the working parts A small brush is a must for removing lint.

At least once a month clean the machine If you do a lot of sewing, you may need to clean it more often Before oiling the machine is a good time to use the lint brush — remove the throat plate and clean the bobbin carrier Use the brush wherever you see lint on machine parts

● Poultry Assn.

(Continued from Page 8)

M Buchman who operates a 28,000 cage layer farm in highly populated Bucks County

Buchman said he built his first cage house in 1959, and decided to use lagoons to handle the manure. In the next three years, he related, neighbors began to actively protest in all directions — he described his farm as being solidly surrounded by houses

"It's been four years since that crises finally ended," he said, "and I'm just now being accepted back into the community"

Despite his bone-crushing experiences in that poultry-people war, Buchman seemed to have retained a sense of humor Tongue-in-cheek, he suggested that when a poultryman with close neighbors on all sides cleans out his chicken house — a job he should do as seldom as possible — he should take care to notice the wind direction so that he doesn t show favoritism toward any particular neighbor

"If you only give them a shot of that odor every once in awhile they're likely to forget how bad it is between times" the poultryman explained

LIQUID MANURE

Handling poultry manure as a liquid is one of the worst things to ever happen," Buchman said, and he believes it "is on the way out".

He has learned that manure kept as dry as possible, and disturbed as seldom as possible, will avoid a lot of problems for the poultryman in suburbia.

Buchman said that in his new, 19,000-bird house with flat deck cages, everything is suspended from the ceiling. He says he has enough manure storage space under the cages that it may be five to seven years before he'll have to clean it out

"Outside of this house, you positively cannot smell manure, and we have no fly problem in the house," Buchman stated

NEW LAWS AFFECT POULTRYMEN

John P Durr, regional sanitary engineer with the State Health Department, described two laws which will affect poultrymen as well as everyone else in the Commonwealth They are both "good laws", he said

Referring to the Pennsylvania Clean Streams Law, Durr said the state had such a law on the books since 1905, but that it lacked enabling legislation to prosecute offenders It was revised in 1935, 1947, and again last year, and he said the latest revision will make it really meaningful for the first time.

The second piece of legislation, the Sewage Facilities Act, will become effective in July, 1967. This will provide far more control over where and how building developments will be placed.

The combined effects of these two pieces of legislation will change the way many of us make our living, Durr said, but he implied that everyone will benefit in the long run

URGES FARMER INVOLVEMENT

"It seems that in the past decade, Pennsylvania farmers have decided to become part of the total community," Penn State public affairs specialist William M Carroll observed.

As a state, Pennsylvania has put more effort into planning and development than any other place in the nation, Carroll said He urged poultrymen to involve themselves in community affairs at township and county levels He added they should keep in close touch with all public meetings and officials, to be sure their interests are represented

"There's going to be a lot more public interest in the quality of our environment— all types of pollution will come under closer regulatory scrutiny," he advised the poultrymen

He labeled refuse disposal "the biggest problem we face as human beings — not just for poultrymen, but industries as well"

The informational meeting, sponsored by the Lancaster County Poultry Association, was the first of a series of three The next one, February 7, will examine egg marketing and new products; the third meeting will be held February 28, and will deal with financing All will be held at the Lititz Community Center

Discussion leader for Monday night's meeting was Dr Floyd Hicks, extension poultry specialist

ABS Purchases 4 Top Bulls

American Breeders Service, Inc., of De Forest, Wisconsin, excited the Holstein world by purchasing at a Public Auction on December 17, 1966, the four proven sires that headed the great Don Augur Holstein Herd at Northford, Connecticut. This herd was the highest producing herd in the U. S. for five out of the last seven years with a current HIR average of 21,933 M 3.7% 821 BF, for 35 records. Don Augur Mothermarthas Promis and Don Augur Mothermarthas Pride, two brothers out of the grand old brood cow in the herd, sold for $108,000 each to American Breeders Service. This price set a new record for a Holstein Bull sold at Auction. American Breeders Service also purchased Don Augur True Type Model for $70,000, and Don Augur Wis Ideal for $30,000. The tremendous sale average for the more than 70 animals sold was $8,719 . . . more than twice the former record price for a dispersal on the North American Continent.

Now every ABS customer, and customers of other breeding organizations who will soon be switching to the WORLD'S LEADING STUD, will have at their fingertips the same genetic building blocks that Don Augur used in building his great herd.

PRICES:

Promis and Pride will be per 8 Ampels for $95.00 with order, True Type Model $90.00 for 8 Ampels and Don Augur Wis Ideal $60.00 for 8 Ampels.

Please order before January 31.

We have Ful-O-Pep Pig Bracer
With Aureo S. P. 250

When you consider the investment you have in each little pig farrowed, it's easy to realize why early losses—largely due to scouring—are so costly.

New Ful-O-Pep Pig Bracer has Aureo S P. 250, the new antibiotic-sulfa combination that aids in the treatment of bacterial enteritis in swine and prevention of the disease during time of stress. This combination also aids in the reduction of the incidence of cervical abscesses and the maintenance of weight gains in the presence of atrophic rhinitis.

Where scours are a problem—either in nursing pigs or following the stresses of vaccination and weaning—Ful-O-Pep Pig Bracer may solve your problems.

(Continued from Page 1)

R2 received recognition for her ten years' service to home economics groups.

SCHOLARSHIPS AWARDED

Richard Thomas, Millersville R1, Lilli Ann Wivell, Columbia R1, and Glenda Watts, Gap R1 each received $100 scholarships, while a $50 scholarship went to Annette Long of Lititz R3. The awards were made by Mrs. Joanne K. Bowman, assistant home economist, and were sponsored by the Lancaster County Bankers Association.

NEWS REPORTERS CITED

Awards were presented to the county's two outstanding 4-H news reporters by associate county agent Winthrop Merriam. Jan Hunsicker, Garden Spot Sewing Club, was awarded a desk pen and pencil set presented by Lancaster Farming, and Jane E. Andrews, Stevens Hill Club, received a tray awarded by Lancaster Newspapers.

Featured speaker D. L. Biemesderfer, retired president of Millersville State College, spoke on "Understanding Today's Youth".

BOARD OFFICERS ELECTED

Fred Linton, Quarryville R2, was elected president by the board of directors. Other officers named were Mrs. Noah Kreider Jr., Manheim R1, vice president; and Judy Longenecker, Drumore R1; secretary-treasurer.

Elected directors were Mrs. Kreider, Mrs. Richard Hess, Strasburg R1, Judy Longenecker, John Zimmerman, Reinholds R1; and John Thomas, Millersville R1.

LEADERS HONORED

Agriculture leaders cited for five years were:

William Arrowsmith, Peach Bottom R1; Mrs. Fred Shaub Jr., Drumore; Mrs. Floyd Atkins, New Providence R1; Earl Fisher, East Earl R1; Mrs. Kenneth Forry, 3016 Marietta Ave.; J. Harold Frey, Marietta R1; Paul Sites, Manheim R2; and John Edwards, Ephrata R1.

Home economics leaders, five years:

Mrs. Donald E Groff, Christiana R1; Mrs. Robert Horner, Oxford R1; Mrs. Dean Lefever, Kirkwood R1; Mrs. Edward Pyle, Oxford R1; Mrs. Roy W Hoober, New Holland; Mrs. Edwin Lorah, Stevens R1; Mrs. Stehman Nolt, Stevens R1;

Mrs Richard Andrews, Elizabethtown R1, Mrs. Albert Dohner, Manheim R3, Mrs Samuel Hevener, Lititz R2; Mrs. Roy Martin, Elizabethtown; and Mrs John Bare, Witmer.

Judy Buckwalter, Lititz R3, served as toastmistress for the event

4-H NEWS

4-H CONSERVATION CLUB ELECTS G. MARTIN PRES.

by Curtis Horst, reporter

A meeting to organize the Northern Lancaster County 4-H Conservation Club was held last Friday evening at the home of Aaron Z. Stauffer, Ephrata R1.

Election of officers was the first order of business, and members named Gerald Martin of Stevens R1 as president. Other officers were: Dennis Martin, Stevens R1, vice president; Myron and John Zimmerman of Ephrata R1, secretary and treasurer, respectively; Curtis Horst, New Holland R1, news reporter.

Also appointed was a game committee consisting of Louis Hurst and Clark Stauffer, both of Ephrata R1, and Leon Roy Martin, Stevens R1.

A demonstration on how soils are formed was given by Clark and Ronald Stauffer. By heating rocks and dropping them into ice water, the boys demonstrated how rocks break up into various sized particles. They also showed how rocks can be split when water collects in crevices and then freezes.

Club leader Aaron Stauffer urged any conservation-minded youngsters between the ages of 9 and 19 to attend the next club meeting at his home on February 3, at 7:30 p.m.

The Conservation Club is cosponsored by the county extension office and the soil and water conservation district.

CENTRAL TRACTOR CLUB HOLDS 3 DEMONSTRATIONS

by Lynn Royer, reporter

The Lancaster County 4-H Central Tractor Club held its second meeting at Kauffman Bros. Farm Equipment Co., Mountville, on January 24 Three demonstrations were featured.

The first one, "Why you should keep the cover on your power take-off shaft" was by Randy and Gary Neff of Millersville R1.

Second, "Fuel vapors and where they go", was by Kenneth Risser of Leola R1.

Third, "Do not refill an engine when it is hot and keep the engine clean", was presented by Kurtis Charles, 2249 Leabrook Road, and James Kilheffer of Manheim R1.

Members were also shown a film on the electrical system of a tractor.

The next meeting will be at the L. H. Brubaker Farm Equipment Store, Lititz, January 31, at 7:30 p.m.

Sorghum-Sudangrass Hybrids

Pioneer offers you 6 outstanding alfalfas . . . each bred to fit specific needs. They'll help you get the most from each acre.

Pioneer brand forage sorghums 931 and 940 stand out as the New Generation in sorghums —proved in several official state tests. Fill your silo on an amazingly few acres.

If sorghum-sudangrass hybrids fit into your plans, plant Pioneer variety 985. It's bred for fast starts and quick regrowth.

Take the first step toward top yields of forage; order the seed you'll need when your salesman calls.

Thursday, February 2, 1967 — 12:30 Noon
At the Ass'n. Sales Pavilion, 6 miles E. of Lancaster, Penna.
47 HEAD — 30 COWS — 8 BRED & 9 OPEN HEIFERS
T.B. & Bangs Cert. Vacc. Dehorned
20 fresh or due between Oct. & Mar.
This top producing herd owned by Robert Kratz, Telford, Pa., has averaged over 10,000#M for the last five years.
1966 AVERAGE: 10,342#M - 530#F
When the tester was at the farm in December all cows in milk (all in the sale) averaged 38.3#M.
A young herd, no "dead wood" was ever allowed to stay. Truely one of the top herds we have had the opportunity to offer to the public.
Cattle must be sold regardless of weather. Be sure and be there. It is the opportunity of the year.
